unique data about this

All of the

document, is in

here

1878 (1888) 1888 - Silving Sampaliya indaya and the fellowers of principal to be 1888 1888 - Silving Sampaliya (1888) (1888)

2. PATMENTS
(A) The end flow of Personnel
1 Will sopplicitly and bears by making payments every mark.

required to be stored in th

symbol, higher density

symbols may be used.

As more information is

ander die Freis, by mandely payments will be upplied to known before principal. If to Milk from marrow in half on the deep, which is to called the "manurity deep". I will make top meetaly payments to \$450, Maland Attracts. Chicago. Milkala. or to

(8) Assess of Needly Payments My seadly pysess will be in the sames of U.S. Delhot Ove 1 I any make to had propryment on paratal propryments withouts project to sucker the names of principal flow I are sucke the Name. If names y paratal propriet and any manufact propriet at the name of propriet and against the writing or them element makes the first of them element.

Typically a 2-D barcode is

used to start and you can

migrate to a data glif for

example.

5. LOAN CRAACES

N. ber, wicks applies in this larse and which not maximum has collected or to be explored in compaction. With the form of the promises.

The Plats Radon way down to make the releasd by referring the principal I are make the Plats of referring the releasion of the remark as a parish propopurate.

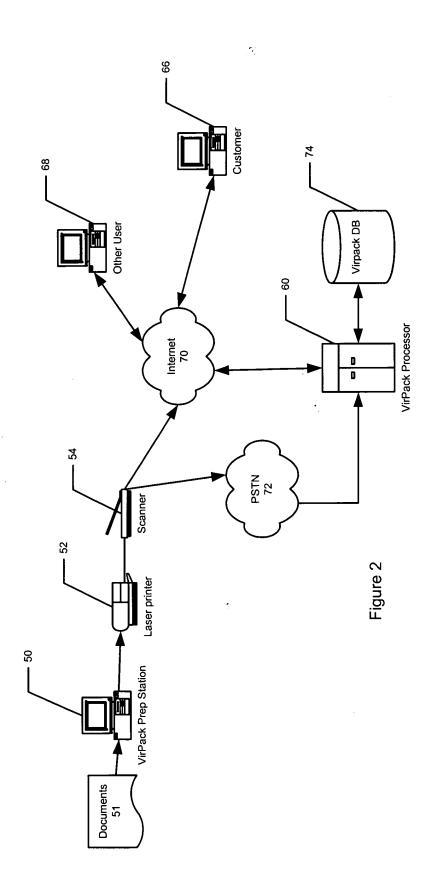

BOREOWER'S FAILURE TO PAY AS REQUIRED

Spike in ag de lid somme of each monthly property on the date to date, I will be to detail.

themselves to the correct place, thus eliminating reconciliation processes

XWPL is the foundation upon which the VirPack isbuilt

Can carry an EDI transaction providing the same benefits, while also making accommodations for paper based information such as form types, familyofforms,

Data is easily extracted from XWPL barcodes with the simple swipe of a wand

High levels of security areinsured through encrypted XWPL barcodes

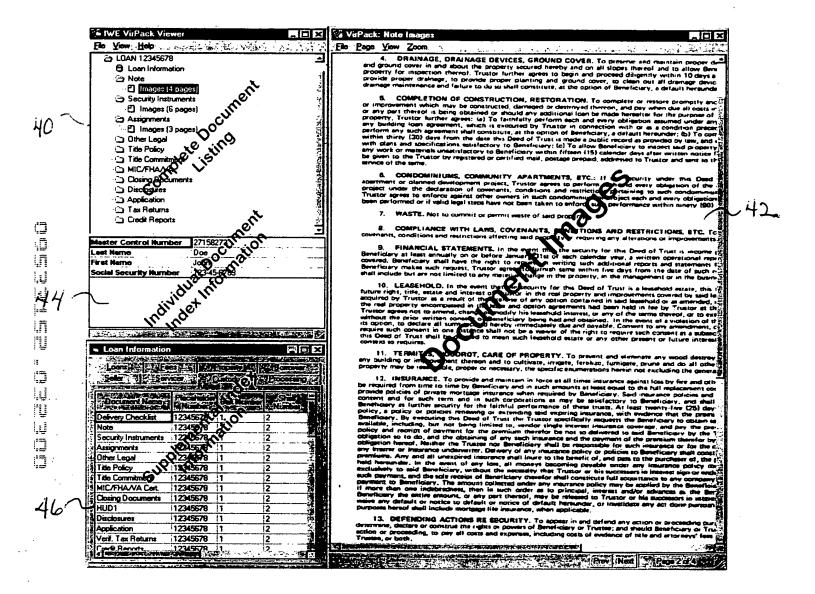

XWPL barcodes can also be us d to assist in managing docum nt inventory

user requirements
